

GSHS FACILITIES

STATE OF THE ART FACILITIES

2024 has been the year of construction at Gladstone State High School. Our Business Manager and team have been very busy coordinating all the works in our school providing our students with amazing new facilities.

Earlier this year we welcomed Assistant Minister for Education and Youth Justice, Corrine McMillian, to visit our new Hydrogen Hub. The Hydrogen Hub is a fantastic opportunity for our students who are interested in STEM. We are look forward to seeing the wonderful work continuing in our Science Department.

Our new Design and Technology building is currently set to finish and be ready for 2025. This building you will see on the outskirts of our Top Oval. This space will be for our Design and Technologies students with all new state of the art equipment.

Our new Design and Technology Building is taking shape.

The Assistant Minister came to visit our new Hydrogen Hub earlier this year.

MURRI ROOM

Proposed new Green Space between B and N Block.

Our Junior Indigenous Leaders, Aunty Rach and the new Murri Room in D Block. The new space has been refurbished and an outdoor kitchen has been built for all of our Support Services to access, we can't wait!
